

Transparent delta trap

Non-discriminative universal transparent insect trap

Specifications

Colour: transparent
Material: PVC

Weight: 30 gram
Length: 21 cm

Width: 10 cm
Height: 8.5 cm

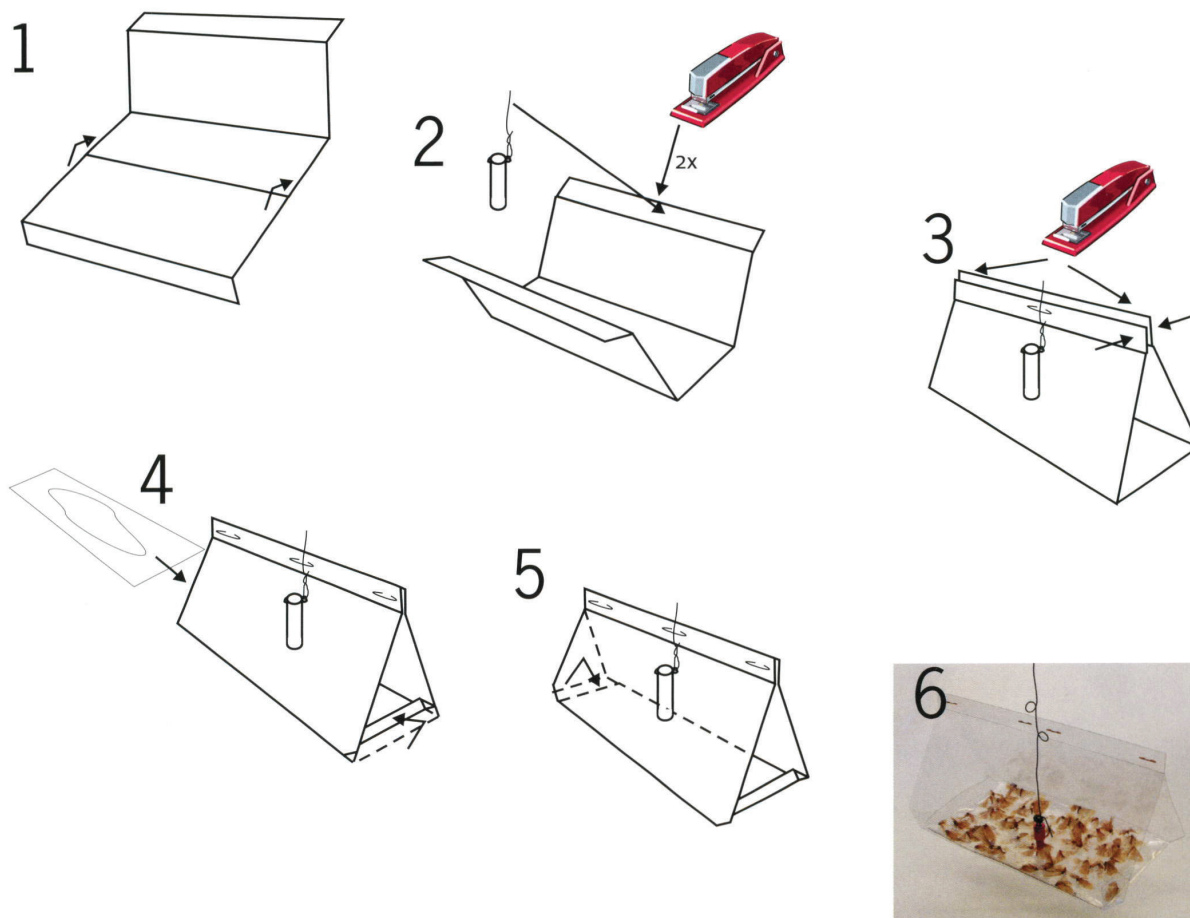

Delta trap

Available in sets of 10 traps, including metal wire

Sticky inserts with non-drying glue (Art. No. 33205)

Available in boxes of 20 pieces

Pherobank delta traps have been designed to be species specific. Colored traps often attract a wide range of insects. That is why we apply solely transparent materials in our delta traps and sticky inserts.

Application

Assemble the trap in accordance with the instructions. Position the pheromone lure preferably two to three centimeters above the sticky surface. The pheromone lure may be placed on the sticky surface itself. Place traps at the height where the target insect is expected to fly. Never (re)use traps for different insect species. Use in combination with Pherobank lures for best performance.
