

Otiorhynchus sulcates

Specifications

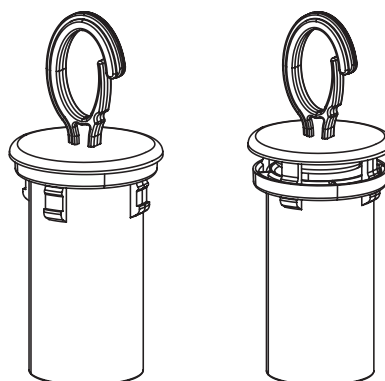

Colour: blue

Material: vinyl
Weight: 26 gram

Diameter: 4.5 cm
Height: 45 cm

Ruffle trap

Omnilure™ (left: closed, right: activated)

Ruffle trap is a flexible refuge trap. The ruffle trap can be wrapped around trees or placed on the soil within ground covers. Hang an activated Omnilure™ with attractant in the plant above the trap to lure the weevils. Place the ruffle trap in a freezer to kill the weevils that have taken refuge in the ruffle trap.
