

White delta trap

Non-discriminative universal white insect trap

Specifications

Colour: white (different colours possible)
Material: polypropylene

Weight: 122 gram
Length: 27 cm

Width: 19 cm
Height: 13 cm

White deltra trap

Available in sets of 10 traps, including plastic clip and sticky insert.

Sticky inserts with non-drying glue (article 33214)

Available wrapped per 10 pieces

Application

Assemble the trap in accordance with the photo shown above. Position the pheromone lure preferably two to three centimeters above the sticky surface. The pheromone lure may also be placed onto the sticky surface itself. Place traps at the height where the target insect is expected to fly. Never (re)use traps for different insect species. Use in combination with Pherobank lures for best performance.
