

Zeuzera trap

Trap designed to catch *Zeuzera pyrina*

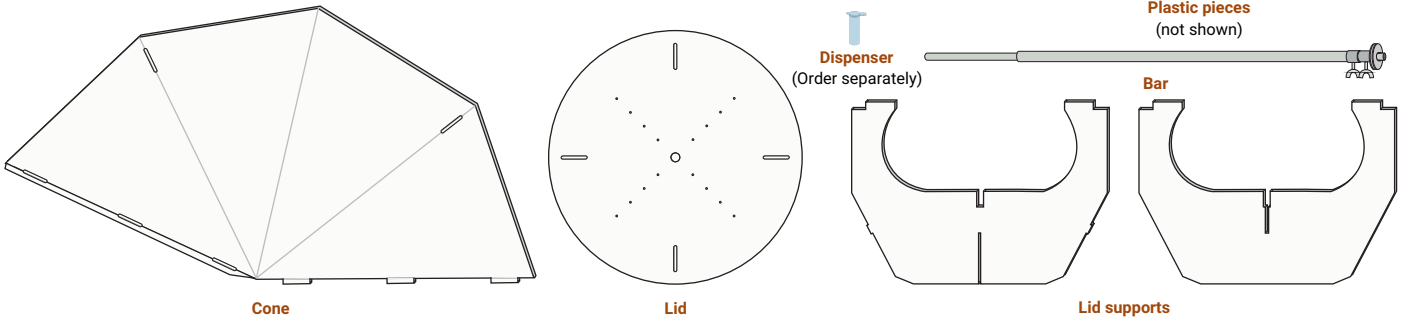

Specifications

Colour: white

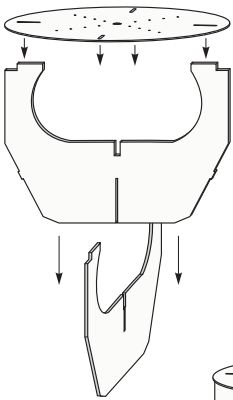

Material: Polypropylene
Weight: 230 gram

Diameter: 39 cm
Height: 100 cm

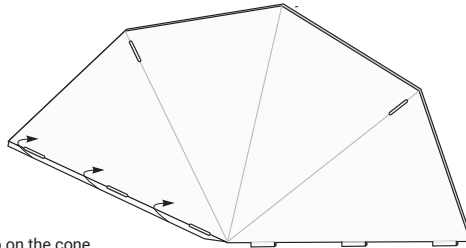

Components

Assembly

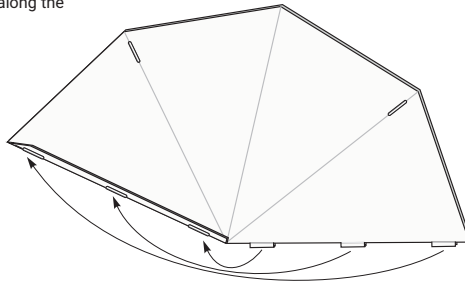

1. Insert plastic pieces (not shown) into the lid
2. Insert the 2 supports into each other.
3. Push the tabs on the supports through the slits in the lid.

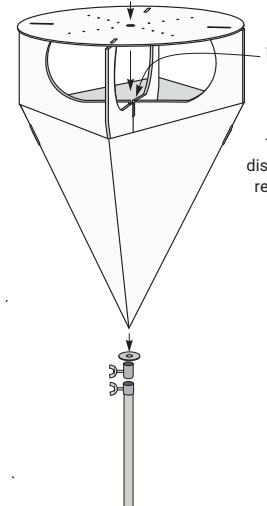

4. Fold the flap on the cone to the non-printed side.
5. Insert the tabs of the cone into the slits along the flap.

6. Insert the tabs on the supports into the slits in the cone.

7. Loosen both butterfly nuts on the bar. Remove the short bar, the tube with the butterfly nut and one washer.
8. Insert the longest bar through the lid, making sure that 1 washer is still on the bar. Past the support/cross. Through the cone.
9. Place the second washer on the bar. Add the tube with the butterfly nut and slide both upwards. The lid and the cone are now tightly squeezed in between the washers.
10. Slide the remaining piece of bar into the short bar to complete the assembly of the trap.

11. Place the dispenser into the recess in the lid supports
