Cross-vane trap

Trap for bark beetles, metallic wood-boring beetles & longhorn beetles

Assembly continued

Assembly instructions for the trap:

- Insert the vanes into each other and fasten at the top and bottom using cable ties.
- Place the lid with the four slits on the vanes.
- Bend the hanger apart at both ends and feed one end through the eyelets of the vanes that stick out of the lid. and bend back.
- Put the funnel on the bottom side of the vanes with the four slits.
- Feed the straight end of the four plastic hooks respectively through one eyelet on the vanes until

- it hangs down vertically.
- Hang the adaptor in the groove of the four plastic suspension lines of the bottom part.
- Then attach the catch cup with the bayonet lock until it locks.
- When the trap is installed, the pheromone is attached to the pre-punched hole in the cut-out on the main body by using a wire or strap.
